MAYANK SHARMA

Software Engineer | Full Stack Developer

mayank.sharma.mitus@gmail.com | +91 7290986499 | Delhi, India | LinkedIn | GitHub

PROFESSIONAL SUMMARY

B.Tech. Computer Science graduate with hands-on experience in full stack software engineering, SDLC, and scalable web application development using React.js, Next.js, Node.js, and MongoDB. Proven ability to design, build, and deploy production-grade applications with clean code, RESTful API design, secure authentication systems, and database optimization. Adept at problem solving, debugging complex issues, and delivering reliable software solutions. Actively seeking Associate Software Engineer / Full Stack Developer roles in MNC and product-based companies.

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), Python, C++

Frontend Development: HTML5, CSS3, React.js, Next.js, Responsive Design, Mobile-First Design, UI/UX

Backend Development: Node.js, Express.js, REST API Design, API Integration, JWT Authentication, Authorization, Session Management

Databases: MongoDB, SQL, PostgreSQL, Schema Design, Database Optimization, Query Performance, Efficient Data Management

Software Engineering Concepts: OOPs, DBMS, Operating Systems, Computer Networks, Data Structures & Algorithms, Software Testing, Clean Code, Debugging, Scalable Application Design, Agile Methodology

Deployment & Tools: Git, GitHub, Firebase, Vercel, Netlify, CI/CD Basics, Basic Server Management

EXPERIENCE

Software Engineer Intern | APK Webtech | *July 2025 – December 2025*

- Developed and maintained full stack web applications using React.js, Node.js, and MongoDB, building scalable production-level solutions with Agile development practices.
- Designed RESTful APIs with JWT-based authentication and optimized MongoDB queries, improving backend security, database efficiency, and API response performance.
- Collaborated on debugging, third-party API integration, and CI/CD workflows using GitHub Actions, enhancing application stability and reducing deployment time.

Freelance Web Developer | Self-Employed | *January 2026 – Present*

- Delivered end-to-end full stack web development solutions, handling requirement analysis, architecture design, development, testing, and deployment independently.
- Built and deployed responsive, SEO-optimized web applications using React.js, Next.js, Node.js, and MongoDB with secure JWT authentication and scalable REST APIs.
- Improved website performance by 35% through code optimization, lazy loading, and caching strategies

PROJECTS

Full Stack Blog Application | *Next.js, Node.js, Express.js, MongoDB, JWT, REST API* [Live Site]

Architected and deployed a production-grade full stack blogging platform using Next.js, Node.js, Express.js, and MongoDB with server-side rendering (SSR), improving SEO performance and initial page load speed by 40%. Implemented secure JWT authentication, role-based authorization, scalable RESTful APIs, and optimized MongoDB queries with pagination and indexing, improving API response time and database efficiency.

Fitness Business Website | *React.js, HTML5, CSS3, JavaScript, SEO* [Live Site]

Developed a fully responsive, high-performance business website using React.js with modular and reusable components, following mobile-first UI/UX principles and cross-browser compatibility standards. Improved organic traffic by 45% and Lighthouse performance by 38% through SEO optimization, code splitting, lazy loading, image optimization, and WhatsApp API integration for better user engagement and conversions.

PROBLEM SOLVING & DSA

Completed Data Structures and Algorithms certification in C++ (2022) with strong practice in arrays, linked lists, trees, graphs, sorting, and dynamic programming. Actively solving problems on LeetCode and HackerRank with 100+ problems completed, supported by a strong foundation in DBMS, Operating Systems, Computer Networks, and OOPs.

EDUCATION

Bachelor of Technology (B.Tech.) — Computer Science

JIMS Engineering Management Technical Campus | 2024
